PRODUCT GUIDE

Application:

2016 – Current Audi R8

Carbon Fiber Front Air Dam

The Front Air Dam / Splitter features a set of add-on Front Bumper Canards and Spats that can be attached to both ends of the splitter. The canards and spats help to redirect airflow away from the wheel wells to reduce drag, as well as improve the effectiveness of the splitter to maximize downforce.

2016 – Current Audi R8

Price: \$TBA

Carbon Fiber Side Skirts

Made of lightweight and durable carbon fiber composites, APR Side Rocker Extensions help reduce lift at high speeds by preventing air at the sides of the car from rolling underneath the car. The reduced lift helps to stabilize the car during high-speed cornering and helps to increase traction for faster lap times.

Carbon Fiber GTC-500 Adjustable Wing w/ Carbon Fiber Active Spoiler Panel Replacement

Each GTC Series airfoil is composed of lightweight and durable carbon fiber reinforced polymer (CFRP) composite materials. These airfoils contain pre-pregnated woven carbon fiber sheets for superior strength and low weight. All CFRP airfoils are made using pre-pregnated composite manufacturing processes (i.e. high-temperature autoclave and vacuum bagging) in high-quality aluminum billet molds.
