Carbon Fiber GTC-250 Adjustable Wing (Center Cover Included)

The GT-250 wing features an all-new, low-drag, aerodynamic airfoil shape. Its "2D" design allows the wing to maintain a consistent level of down force across its entire span.

Carbon Fiber Front Bumper Canards

APR Front Bumper Canards are the perfect answer to aerodynamically tune the handling for the front of a car. Made of lightweight and durable carbon composites, APR Front Bumper Canards help increase front downforce at high speeds. The added downforce stabilizes the cars chassis during hard cornering and increases traction for faster lap times.

SKU: AB-201810

Price: \$378

Carbon Fiber Front Wind Splitter (Non-performance Package)

To combat the effects of front-end lift, APR Front Wind Splitters are utilized to give extra traction and control in the front of a car. By creating a high-pressure area on top of the wind splitter, high pressure air flow is restricted to flow underneath a car. With low pressure below the car, the effect of lift is reduced, and a driver can gain from the extra traction and control.

2018 – Current Mustang GT (Non-Performance Package)

SKU: CW-201822

Price: \$488
